Investment Objective & Strategy

The Columbus Money Market Fund is a low risk multi-managed money market product. The underlying investments are allocated to a number of money market managers appointed and selected by Sygnia based on their skills, experience, performance and operational and financial soundness. The aim of the product is to offer investors access to a well-diversified money market portfolio that utilises the best money market managers, while ensuring that the risk profile of the strategy remains consistent over time.

Balancing Risk and Reward

The Columbus Fund has a 100% allocation to money market instruments and has a low risk profile. It is a suitable investment for investors seeking to preserve capital over all time horizons.

The product has a low risk profile as it has a 100% strategic allocation to money market instruments. The product aims to outperform the STeFI index through a combination of arbitrage, credit yield enhancement and duration positioning.

Fees

Sygnia charges an annual management fee comprised of applicable basic fees paid to underlying managers and Sygnia's annual service fee.

Fees charged by underlying managers are treated as an expense of the account.

Sygnia does not provide advice and therefore does not charge advice fees. If a financial planner is appointed, initial and ongoing advice fees may be payable as agreed upon between you and your financial advisor. The payments of these fees are facilitated by the Linked Investment Service Provider (LISP) where the fund is made available and not directly by Sygnia.
